

BAG LINNING FILMS

Benefiting from its position as leading European leader manufacturer of "Free Film": a high density polyethylene film for bag lining, Leygatech has developed the range in order to offer you a much wider choice for your applications.

- PEHD wraps and films
- PEBD wraps and films
- Resithène and Trimalène®
- Barrier wraps and films

FREE FILMS

Our many years of experience on these markets and perfectly mastered compounds mean that our films are perfectly adapted to your process production rates.

CLASSICS

We can offer you medium and high density polyethylene mono or co-extruded wraps and films especially designed for paper bag lining.

BARRIERS

Thanks to our 5-layer co-extruder, we can offer you barrier films (oxygen, flavouring...) made of EVOH or Polyamide

THE TECHNIQUES

In order to meet requirements in terms of thickness reduction, we have developed specific compounds (Trimalène®, Résithène) that mean that we can offer films that feature the same mechanical properties as a traditional film up to 50% thicker.

RANGES

DIMENSIONS

SPECIFICATIONS

HD high density range

From 10 µm

antistatic

BD low density range

From 30 µm

- UV stabiliser

Barrier range

From 400 to 1300 mm

- anti-block

Trimalène®

Please contact us

- slip

Resithène

Please contact us

- Corona treatment ??????????????????

Other additives can be used on request

OTHER CHARACTERISTICS

Variations

Film colours

Colour or transparent

Printing

Up to 6 colours according to sizes

Finish

micro-perforations

straight or staggered notches
